Loading the map - please wait... The table below allows you to choose which types of attractions and facilities you want to see on the map. Use this interactive map of the most popular attractions, museums, excursions and other facilities to plan your route. Start by grouping the attractions, excursions, sights and places you want to see by the surrounding area to make the most of your time in the city and get the most value from your New York Pass. How to use the tourist map of New York: Check in all categories of attractions that you are not interested in to filter out the map of attractions. Then click on each icon on the map above to see the name of the attraction, a brief description and a quick link to see more information, including the attraction's operating hours and instructions. Rank by category of attractions: Attractions: popular experiences, activities and landmarks. New York City Museums: all cultural institutions that explore different topics. Cycling: guided cycling tours and bike rental (unlike hourly rentals, you can find them all over the city, including locks and helmets). NY Sightseeing Cruises: Where to go to catch a guided sightseeing cruise. Walking tours: meeting places for various guided tours. Behind-the-scenes tours: meeting places for tours that offer visitors exclusive access or information that is not available to the general public. NY City Zoos and Gardens: attractions for anyone interested in animals, plants, or general biodiversity studies. Special offers: location of all facilities, shops, restaurants and other attractions that offer exclusive offers to New York pass holders (the card must be valid when you claim your offer). Tips for navigating the city: The layout of New York City is easy to learn quickly. Urban planners designed the streets of Manhattan on a numbered distribution system. Street numbers increase as you travel north and avenue numbers increase when you travel from east to west. In general, 20 street blocks corresponds to 1 mile. By comparison, Fifth Avenue divides Manhattan longitudinally so that all intersecting streets have a west and east preceding their names depending on which side of Fifth Avenue they are on. Other trip planning tools: If you're looking for a tourist map to print, download all our free trip planning tools to get a 250-page guide, a New York City subway map, a printable tourist map of New York, and a hop-off bus map.
